

GS Rigid™ 96 & 384 Well Plates

Finally! A plate designed and developed without compromise to offer the perfect plate solution for both daily routine molecular lab use and robotic applications. Gene Technologies have developed a new range of plates that will be the only plate that you and your lab will ever need!

- One-piece design polycarbonate and polypropylene for optimum performance.
- Improved plane parallelism.
- Manufactured for rigidity.
- Improved well-to-well tolerance.
- Extremely thin-walled for optimum heat transfer into the sample.
- Perfect for FAST protocols.
- Fits most thermal cyclers.
- Cut-away corner and alphanumeric grid referencing.
- Raised well rims for effective sealing and reduced risk of cross-contamination.
- Autoclavable.
- Certified to be free of any detectable human DNA, DNase, RNase, and PCR inhibitors.
